

The main conference venues for SERMACS 2002 are the Lightsey Center, the Westin Francis Marion Hotel, the Embassy Suites Historic District Hotel, and the Tate Center. There will be activities at other locations, such as the computer classroom in the basement of the College's Robert Scott Small Library, the GIS lab on the first floor of the College's Science Center, the main lobby of the Charleston County Public Library, the National laboratories at NOAA Ft. Johnson, and our socials at the beautiful SC Aquarium and College's Cistern. All of these venues, with exception of the NOAA labs, are within walking distance of the central SERMACS 2002 meeting locale, which is the lobby of the Westin Francis Marion Hotel.
